About Us

Founded in 1992, Prestige Garage Doors began as a home based, family owned retailer of garage doors.

While our current range started as a solution to more technical projects we soon began to receive requests from Architects to raise the industry standard in delivering premium quality products.

We now employ a highly capable team of welders, fabricators and office staff to deliver fully customisable, hand-crafted products.

Our Frames

Prestige Welded Aluminium Box Frames hold ultimate durability allowing for a Lifetime Warranty.

These frames are perfect for;

- ✓ Cedar Doors which require large fixing area
- ✓ Oversize Doors or Heavy Doors
- ✓ High Impact Resistance

Our Process

Consult

Prestige have designated area representatives who will consult with you to find the most suitable product for your property

Design

Our design team will work with any builder, architect or home owner to create the perfect garage door design.

Manufacture

Our specialist welders, joiners and fabricators will work together to provide your product with a premium quality finish per your specifications

Install

Prestige have dedicated installers who can work with your builders to ensure your garage door is installed without any delays or complications

8.2 Metre Door

Welded Box Frame + Antisags

8.2 Metre Door

Client Review

I rang the guys at Prestige to help with the conversion of an old garage with two tilt doors to a new well-secured door. I built the framework for the door on day 1 and they fitted the door on day 2. I am in the Aluminum business and absolutely delighted with the final design, finished product and install team who completed the project effortlessly

Darren

Prestige has been our preferred option for garage doors for a number of years now as they are sturdy and strong. We were sick of flimsy steel doors that get dinged all the time and don't align with the level of quality we aim to deliver our customers. The service we get from them is on point, they're always on time and they turn the quotes around in 1 day, always with additional options for us to consider.

We're big fans of the Altec doors as well as the flushmount Cedar or Abodo. At the end of the day, you pay for what you get and we've never looked back.

Thanks to Prestige Garage Doors for an amazing job on our garage door replacement!! We wanted something a bit different and their design team created exactly what we had in mind. Great attention to detail and the communication throughout was awesome. We couldn't be more pleased!

P. Hunt

CEDAR vs ALUMINIUM

- ✓ Traditional Cedar
- ✓ Welded Box Frame Construction
- ✓ Potential for Shrinking or Cracking over lifecycle
- ✓ Requires Paint / Stain Upkeep

- ✓ Powdercoated Aluminium
- ✓ Welded Box Frame Construction
- ✓ Resistant to Corrosion / Rust
- ✓ Options for 10 / 15 / 20 Year Powdercoat Warranty

ALUMINIUM vs STEEL

- ✓ Powdercoated Aluminium Finish
- ✓ Welded Box Frame Construction
- ✓ Resistant to Corrosion / Rust
- ✓ Options for 10 / 15 / 20 Year Powdercoat Warranty

- ✓ Steel Finish
- ✓ Unframed
- ✓ Risk of Rust
- ✓ Thin Cladding Gauge - Susceptible to Warping & Ripple
